

If I need to live on an island by myself, I will bring three things with me. They are a pointy knife, a mobile phone and a gun.

First, I will bring a pointy knife because I will need a knife to cut down the leaves and the bananas on the banana trees. I will also use a knife to protect myself if there are dinosaurs or zombies. Maybe no one has been there because there are dinosaurs.

Next, I will bring a mobile phone because I can write funny stories and play electronic games in the mobile phones. If I want to build a house out of trees but I don't know how to build it, I will use the mobile phone to search the information.

Then, I will bring a gun because there might be dinosaurs that eat meat like *Allosaurus* and *Dilophosaurus*. If there are too many dinosaurs on the island and a knife can't protect me, I will use the gun. If there is no more TNTs in my gun, I will shoot apples, coconuts or even melons down to protect myself.

I am excited to explore the island and go on adventures on the mystery island. I think it will be fun and I might be the first person who sees dinosaurs in real life.
